Reference for Mr Jake Young

I first contacted Jake Young Late in 2019 regarding a home battery system following an advertisement by Sharpe ERS in the South Australian Sunday Mail.

He listened to my request for information on a home battery system linked to the energy supplier, Simply Energy and using the South Australian Government subsidy for battery systems linked to the National Virtual Power Plant.

Having existing solar panels, Jake confirmed that we would potentially be eligible for both the South Australian Government subsidy and the daily payment from Simply Energy. He arranged for a technician to visit our property to confirm our eligibility and to check what was required for installation.

We signed a contract to have a 10kw Sonnen battery installed, which happened in the time frame promised by Jake Young.

We were very happy with the service provided by Jake and impressed with the coordination of the battery installation, subsidy arrangements and ultimate performance of the battery unit.

As a former Senior Contract Manager with the Australian Government, I was impressed with Jake's communication and listening skills and his ability to deliver what he had promised in the committed timeframe.

I strongly recommend Jake Young as a reliable, well organised and enthusiastic worker.

Darryl Dyson
